

WE ARE LOOKING FOR YOUNG MECHANICAL ENGINEERS FOR OUR ANKARA/TURKEY OFFICE

Company Description

Fluid Solutions was founded in September of 2007 when we saw the need for a mechanical systems Distributor with international capabilities. Over the past twelve years we have diversified both our product and service offerings to accommodate the expanding needs of our customer base. We now have a broad range of equipment in more than 100 countries worldwide. Our growing staff includes stateside design, support and project management teams, as well as an international technical service team willing to travel anywhere on Earth.

In 2017 we launched a second office in Turkey with a vision to better serve the growing Eurasian market. Our local sales team there has quickly proven invaluable through their service and support efforts to our international customers.

Qualifications

- Graduation from Mechanical Engineering MSc or BSc
- Excellent communication & interpersonal skills.
- Excellent command of English
- Ability to work in an international working environment, having an international sense of business
- No restriction to travel in and out of Turkey, for both business and training purposes
- For male candidates, no relationship with military service (or exemption from military service by December 2024)

Job Description

- To take an active role in all technical stages of the sales process
- To determine actual needs of customers in order to finalize technical selections and to prepare price proposals
- Manage sales partner companies
- Proactively manage sales opportunities and follow up systematically
